S. P. JAIN, for Registrar General. India

# NATIONAL SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%,  $3\frac{1}{2}\%$  and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. & \$5,000 in then hinclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers or the Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 27th January, 1951

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth end death rates.

<sup>. †</sup> Figures not available.

Explanation of symbols used:—B.—Births; B.R.—Birth rate; C.—Cholers; S.—Smallpox; P.—Plague; F.—Fevers; D.D.—Dysentery and Diarrhose; R.D.—Respiratory diseases; M.D.—Maternal Deaths; D.R.—Death rate; I.D.—Infantile Deaths (included in total deaths).

Births and deaths from ; incipal diseases in towns with a population of over 30,000 in India for the week ending the 27th January, 1951—contd.

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used:—B. — Births; B. R. — Birth rate; C. — Cholera; S. — Smallpox; P. — Plague; F. — Fevers; D. D. — Dysentery and Diarrhoea; R. D. — Respiratory diseases; M. D. — Maternal Deaths; D. R. — Death rate; I. D. — Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 27th January, 1951—contd.

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used:—B. = Births; B.R. = Birth Rate; C. = Cholera; S. = Smallpox; P. = Plague; F. = Fevers; D.D. = Dysentery and Diarrhoea; R.D. = Respiratory diseases; M.D. = Maternal Deaths; D.R. = Death Rate; L.D. = Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in fadia for the week ending the 27th January, 1951--contd.

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used:—B. Births; B.R. Birth Rato; C. Cholera; S. Smallpox; P. Plague; F. Fevers: D.D. Dysentery and Diarrhou; R.D. Respiratory Diseases; M.D. Maternal Deaths; D.R. Death Rate; L.D. Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 27th January, 1951—contd.

#### Deaths from :--

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup>Figures not available.

Explanation of symbols used :—B.=Births; B.R.=Birth rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Fevers; D. D.= Dysentery and Diarrhoea; R.D.=Respiratory diseases; M.D. Maternal deaths; D.R.=Death rate; I.D.=Infantile deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 27th January 1951—concld.

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be aufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used:—B.=Births; B. R.=Birth rate; C.=Cholera; S.=Smallpox; P.=Plague; F.= Fevers; P. D.—Dytentery and Diarrhoes; R. D. =Respiratory Diseases; M. D. =Maternal Deaths; D. R. =Death rate; I. D. =Infantile Deaths (included in total deaths).

#### REMARKS

The figures of births and deaths shown in this statement for the week ending the 27th January, 1951 relate to 161 towes with an estimated population of 20,092 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 69% of the total number of towns representing 69% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,953 and 6,988 representing birth and death rates of 33.5 and 18.1 per thousand of population respectively.

(A) States (Parts A and C):—The data here relate to 134 towns with an estimated population of 16,881 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengel could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 66% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,418 and 6,225 representing birth and death rates of 35.2 and 19.2 per thousand of

population respectively. The table at the end gives the position by states.

The towns of Rajapalayam in Madras and Cuttack in Orissa recorded high death rates of 50·1 and 52·6 per thousand of population respectively. In Rajapalayam the high death rate was largely due to deaths from dysentery and diarshoea and in Cuttack due to deaths from smallpox

(B) States (Part B).—The data here relate to 27 towns with an estimated population of 3,211 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 84 % of the total number of towns representing 84% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,535 and 763 representing birth and death rates of 24.9 and 12.4 per thousand of population respectively.

No towns recorded a high death rate of 50 or over per thousand of population.
